

# 15' GROWING DOME 3D PAPER MODEL

Patterns are numbered at the top of the top triangle. Cut out all 5 copies. From the inside, tape together edges of gussets, then starting with #1 and #2, tape all 5 sections together counter-clockwise to make model. (Model goes together easier if it is pre-folded along each triangle line prior to assembly.)

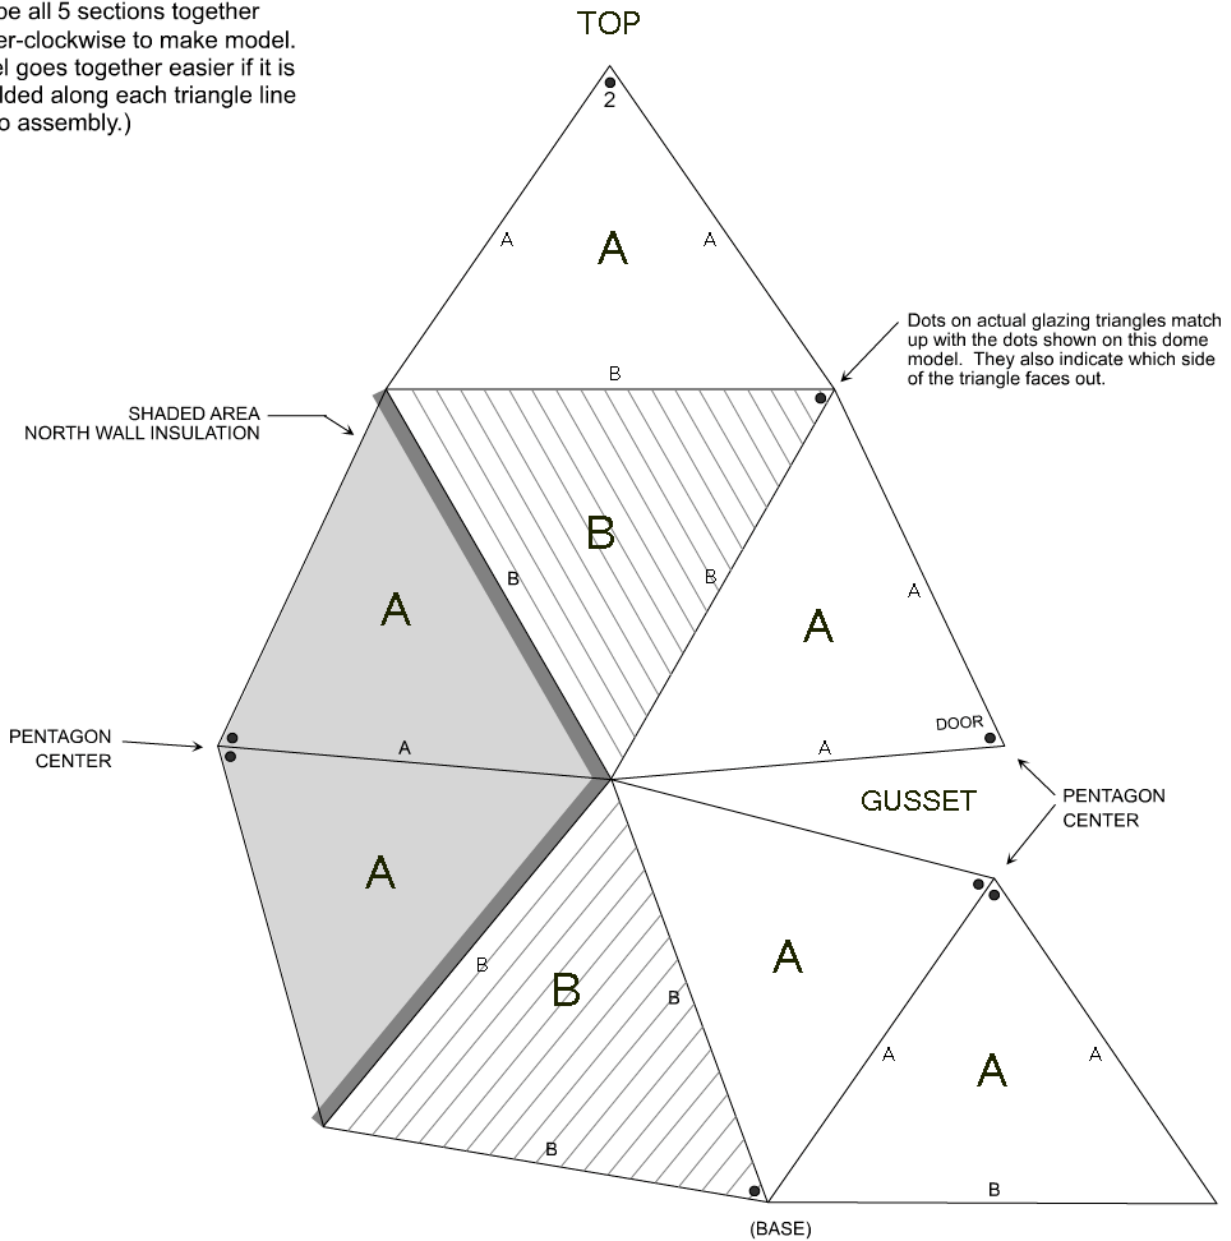

Lines in B triangles indicate the direction of the tubes.
